

BAFAI

BLOOM ACADEMY FOR AI

AI Ethics & Governance Curriculum

Industry-Relevant AI Training for Career Advancement

SCHOLARSHIPS AVAILABLE

T&C Applies

Course Objective

Build a strong foundation in the ethical, legal, and societal impacts of artificial intelligence. Learners will gain practical tools to evaluate AI systems, identify risks, promote fairness and transparency, and contribute to responsible AI governance in organizations and society.

Monthly Salary Expectation

Nigeria

₦318,000 – ₦439,000

Canada

\$7,500 – \$12,500 CAD

United States

\$7,900 – \$11,700

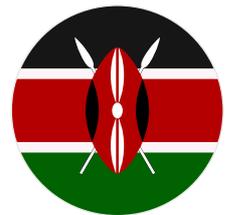

Denmark

DKK 31k – DKK 56k

United Kingdom

£5,470 – £9,830

Kenya

\$190 – \$460

Learning Model

Course Mode

**Online and
Project-based**

Course Duration

12 weeks

Programme Level

Beginner to Intermediate

Certificate

Certificate of completion

Module 01

Foundations of AI Ethics

- What is AI? Key Concepts and Terminology
- Why AI Ethics Matters
- Historical Technology Harms & Lessons Learned
- Core Ethical Principles (Fairness, Accountability, Transparency, Safety)
- Introduction to Responsible AI

Module 02

Understanding Bias, Fairness & Inclusion

- What is Algorithmic Bias?
- Types of Bias (Data, Design, Deployment)
- Fairness Concepts (Equal Treatment vs. Equal Outcomes)
- Real-World Examples of Bias
- Introduction to Inclusive AI Design

Module 03

Transparency, Explainability & Privacy

- Why Transparency Matters
- Basics of Explainable AI (XAI)
- Data Privacy Fundamentals
- Responsible Data Collection & Use
- Introduction to Accountability & Responsibility

Module 04

AI Risks & Societal Impact

- Automation & Job Displacement
- Misinformation & Generative AI Risks
- AI in Public Services
- Ethical Risks of Large AI Systems (Introductory Level)
- Stakeholder Impact Analysis

Module 05

Introduction to AI Governance

- What is AI Governance?
- Overview of Global AI Regulations (Introductory Survey)
- Organizational AI Policies
- Risk Management Basics
- Roles & Responsibilities in AI Oversight

Module 06

Human Oversight & Responsible Design

- Human-in-the-Loop Systems
- Ethical Design Thinking
- Risk Mitigation Strategies
- Testing & Monitoring AI Systems
- Responsible Deployment Practices

Module 07

Case Studies Across Industries

- AI in Healthcare (Ethical Considerations)
- AI in Finance (Fair Lending & Risk)
- AI in Public Sector & Policing
- Generative AI & Media Ethics
- Lessons Learned from Real-World Failures

Module 08

Tools for Responsible AI

- Introduction to AI Auditing
- Bias Detection Tools (Conceptual Overview)
- Governance & Compliance Checklists
- Monitoring & Reporting Mechanisms
- Responsible AI Frameworks (High-Level Overview)

Module 09

Applied Workshop

- Conducting an AI Risk Assessment
- Drafting a Basic AI Ethics Policy
- Stakeholder Mapping Exercise
- Scenario-Based Ethical Decision-Making

Capstone Project

- Learners will complete one of the following practical projects:
- Develop an AI Ethics Policy for an organization
- Conduct a simplified AI risk assessment
- Create a responsible AI implementation roadmap
- Present a governance proposal for a real or hypothetical AI system

Project Defence

Personal Project Presentations

Note:

- All modules, project work, project defense, and grading work will be completed in a total of 12 weeks from the course start date.

Certificate Sample

CERTIFICATE OF COMPLETION IN AI ETHICS AND GOVERNANCE

THIS CERTIFICATE IS PROUDLY PRESENTED TO

Emeka Adediran Audu

Who has successfully completed the Agentic AI course comprising: Foundations of AI Ethics, Understanding Bias, Fairness & Inclusion, Introduction to AI Governance, Case Studies Across Industries, AI Risks and Societal Impact.

A blue ink signature of Dr. Lola Olukewu, consisting of stylized initials 'LO' and a surname.

Dr. Lola Olukewu
Certified Chief Artificial Intelligence Officer
Founder, BAF AI

A black ink signature of Mrs. Tolu Akinjole, featuring a cursive 'T' and 'A' followed by the surname.

Mrs. Tolu Akinjole
Head of Programs
